

Opencart Module Advanced Catalog Manager

Author : treoden
Version : 1.0
Original Release Date : December 08 2014
Opencart Compatibility : v1.5.6.*
Email : treoden@gmail.com
Website : treodenthemes.com

Installation Guide :

Step 1:

Copy the files from the upload directory to your target installation directory of OpenCart

Overwrite 2 files : Manually or using vQmod

I. Using vQmod :

Install vQmod

<<http://www.inmotionhosting.com/support/edu/opencart/308-installing-vqmod-on-opencart>>

II. Manually :

Open file admin/view/template/common/footer.tpl, and add following code before </body> tag:

```
<script>
    $(document).ready(function(){
        $('li#catalog li').each(function(){
            var
old_href=$(this).children('a').attr('href');
            if(old_href!=undefined)
            {
                var new_href =
old_href.replace("category", "advanced_category");
                $(this).children('a').attr('href',
new_href);
            }
            var
old_href=$(this).children('a').attr('href');
            if(old_href!=undefined)
            {
                var new_href =
old_href.replace("product", "advanced_product");
                $(this).children('a').attr('href',
new_href);
            }
        })
    })
</script>
```

Step 2:

1. In the Administration interface, choose Admin > Users > User Group
2. Select Top Administrator, then click edit
3. Add 2 controllers catalog/advanced_category and catalog/advanced_product to Access Permission and Modify Permission
